

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

ServiceNow Micro-Project

PHASE 6 | PROJECT TESTING PHASE

6. Project Testing Phase

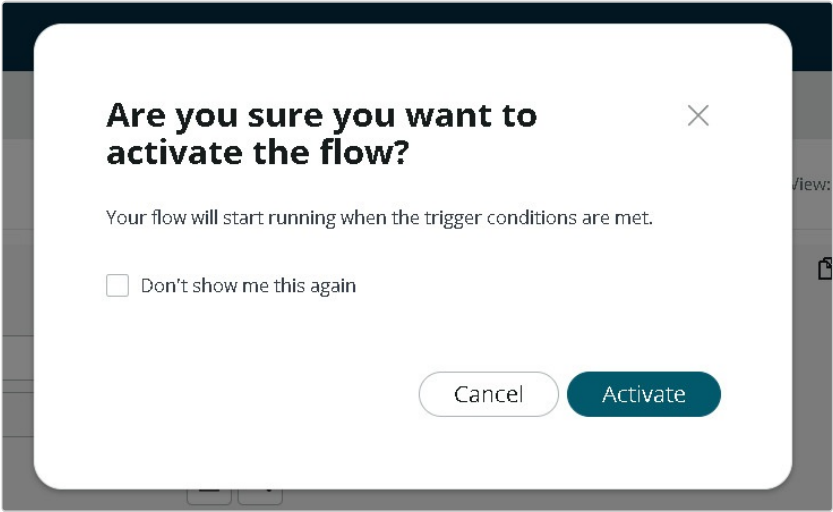

Testing was performed by executing the complete order-to-fulfillment path as an end user and approver: placing a live Standard Laptop request, approving it, and inspecting the automatically generated Catalog Task for correctness.

6.1 Test Case Summary

Test ID	Scenario	Expected Result	Actual Result	Status
TC-01	Flow activation	"Standard Laptop task" flow shows status Active after Activate is confirmed	Flow status shown as Active	PASS
TC-02	Process Engine binding	Standard Laptop catalog item's Process Engine → Flow field = "Standard Laptop task"	Flow field correctly set and saved	PASS
TC-03	Order placement	Ordering "Standard Laptop" generates a Request (REQ) and Requested Item (RITM)	REQ0010001 generated with RITM0010001	PASS
TC-04	Approval triggers flow	Approving the request triggers the flow and creates a Catalog Task	SCTASK0010001 created immediately after approval	PASS
TC-05	Short Description field	Catalog Task Short description = "Laptop needs to Configured"	Matches expected value	PASS
TC-06	Description field	Catalog Task Description = "Laptop needs to Configured"	Matches expected value	PASS
TC-07	Assignment group field	Catalog Task Assignment group = "Hardware"	Matches expected value	PASS
TC-08	Approval field	Catalog Task Approval = "Approved"	Matches expected value	PASS
TC-09	Traceability	Catalog Task is linked to the originating Requested Item (RITM)	Request item field on task = RITM0010001	PASS

6.2 TC-01 & TC-02 — Flow Activation and Process Engine Binding

Steps: Open Flow Designer → confirm "Standard Laptop task" shows Active; open Maintain Items → Standard Laptop → Process Engine tab.

Output screen — Activation confirmation for the Standard Laptop task flow.

Output screen — Catalog Task record detail confirming Approval = Approved, Description = "Laptop needs to Configured", and Request item = RITM0010001 — all fields matching the design specification.

6.6 Regression Observations

- No manual data entry was required at any point after order approval — every field on the Catalog Task was populated by the flow exactly as designed.
- The task's Actual start timestamp was automatically stamped at creation, confirming the flow executed immediately upon approval rather than on a delay or schedule.
- The Catalog Task correctly retained a link back to its Requested Item, preserving traceability for audit and reporting purposes.

All nine test cases passed. The Flow Designer automation reliably converts an approved Standard Laptop request into a fully pre-filled, correctly assigned Catalog Task with no manual intervention, meeting every requirement defined in Phase 2.
